EXPERIENCE

IntelliSeven Solutions Incorporated (Intern)   February 1, 2024 – April 25, 2024

- Used Vue.js, Nuxt, Tailwind CSS, & Express.js.
- Collaborated with fellow developers via Git and GitHub to craft a web-based system featuring robust user authentication, meticulous data validation, and seamless CRUD operations.
- Engineered contemporary websites aligned with prescribed UI/UX designs &, ensuring a seamless user experience.

Offshorly (Junior Full Stack Developer)   June 3, 2024 – Present

- Used React.js, Next.js, Typescript, Tailwind CSS, Express.js, & MongoDB.
- Trained & collaborated with fellow developers via Git and GitHub to craft a knowledge base system that implements similarity search, interacts with Github API & various AI Models.

TECHNICAL SKILLS

- Vue.js
- React.js
- Next.js
- Typescript
- Express.js
- MongoDB
- MySQL
- Tailwind CSS
- RESTful APIs
- Git & Github

PROJECTS

iSchedule Website & iSchedule Admin Website (JavaScript, CSS, PHP, MySQL)

- Developed and implemented iSchedule, a web-based appointment system for Bulacan Medical Center.
- Automated the appointment scheduling with real-time calendar updates, including holidays and booked days, providing patients with easy appointment management.
- iSchedule Admin oversees the website, enabling statistical monitoring, appointment management, schedule management, and exporting data to Excel format.

Catalog-style e-commerce Client Website & Admin Website (Vue.js, Tailwind CSS, Express.js, MongoDB)

- Developed client website during internship, following provided UI designs and collaborated with other developers for the admin website.
- Made client website dynamically displays data from a RESTful API, showcasing categories and product information.
- Added key features to admin website include product creation, display, update, and deletion.
- Implemented multiple Express endpoints for seamless integration and enhanced functionality.

Knowledge Base System (React.js, Tailwind CSS, Express, & MongoDB)

- Process user contribution to knowledge base by AI to improve quality.
- Created dynamic UI for interacting with knowledge base and a robust API.
- Deployed and setup different environments (Prod, Staging, Dev).

Grandline Memory Game (Vue.js & Tailwind CSS)

- Designed and implemented a One Piece-themed memory card game where players match pairs of cards featuring characters from the series.
- Implemented gameplay mechanics like animated card flipping, player health, timer, and a dynamic scoring system for increased player enjoyment.

Pokedex (Vue.js & Tailwind CSS)

- Utilized the PokéAPI to create a dynamic website showcasing comprehensive Pokémon data and information.

EDUCATION

Bulacan State University - Main   2020 – July 18, 2024

Bachelor of Science in Information Technology
Magna Cum Laude
